

Appl. No. 10/825,271  
Am dt. dated February 15, 2006  
Reply to Office action of November 15, 2005

**Amendments to the Specification:**

On page 20 of the specification, please amend the Abstract as follows:

An image projector that modifies projected images. An imaging device preferably senses information about a projection screen upon which an image is projected. Based on the sensed information about the projection screen, the projector modifies the image in a desired manner, such as rescaling, or correcting distortion in, the projected image.
